The Giant Tablet for
Presentations | Annotation | Collaboration

mondopad

Turn conference rooms into collaboration rooms

This is BIG! The InFocus Mondopad™ transforms conference rooms designed for one-way presentations into dynamic visual collaboration workspaces.

Break down visual communication barriers with this giant full-HD wall tablet, its intuitive touch applications and disruptively-priced cloud-based video conferencing.

You and your colleagues can securely connect, share and collaborate with anyone, anywhere – making your meetings more collaborative, productive and sustainable than ever before.

Why your conference room needs a **mondopad**

- Giant 55-in tablet with a beautiful full high definition 1080p (1920x1080) LCD display
- Multi-touch collaboration and presentation applications at your fingertips
- Business-class cloud-based video conferencing that's easy to use and easy on the wallet
- Easily share, view and control content remotely from notebooks, tablets and smartphones

Touch Greatness

The InFocus Mondopad is a great big, sexy specimen of cutting edge visual collaboration technology. With 55 inches of gorgeous full high definition (1920x1080) multi-touch display at your fingertips, the era of brain numbing one-way presentations is finally coming to an end.

Designed for multi-touch, a Mondopad collaboration tablet changes the way people interact with information, collaborate and connect. Meetings are more engaging, content is more immersive, and audiences are more engaged.

Whiteboard Wizard

The Mondopad's whiteboard and collaboration apps make it easy to brainstorm and capture and share the ideas.

- A complete set of writing and drawing tools, pens, highlighters, shapes and lines are at your command
- Whiteboard drawings and notes on your meeting visuals can be collected, saved and emailed to meeting participants right from the Mondopad
- Multiple Mondopads on the same network can connect to form a multi-party whiteboard session with everyone seeing the interaction

Never Lose an Idea

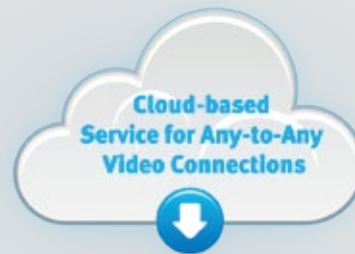

Use the whiteboard's writing and drawing tools to take notes on whatever is being presented on screen. This highly-visual medium allows your teams to communicate more effectively, collaborate in real time, and never lose an idea.

- Circle or highlight key information on PPT slides, spreadsheets, design comps, and more
- Identify information on-screen to help remote participants follow along
- Capture and share the notes with everyone in the meeting right from the Mondopad

“The combination of Mondopad and the Vidtel managed service yields an affordable, high quality, standards-based visual collaboration solution that is easy to install, manage, and use.”

Ira M. Weinstein

Senior Analyst and Partner, Wainhouse Research

- Executive Video Systems • Smart Phones • Tablets
- Video Conference Rooms • PCs • Video Phones

It's Fun to Share

Sharing documents and visuals during a meeting from any device is amazingly easy with the Mondopad's simple and familiar folder structure.

- Add, remove and launch documents from the Mondopad's View/Share folder, which anyone in the meeting can access
- Open the View & Share folder with a tap. Another tap opens your file. Move through your document with a flick of a finger
- You can even email files directly to the Mondopad
- Use all of the office documents (PowerPoint, Word, Excel, PDF, JPGs and more) that you use every day -- all optimized for touch

Not in the Room? Not a Problem.

Connecting the Mondopad to your secure network via its built-in WiFi allows any authorized user to connect to the network through the display and share, view and control their visuals from their PC, tablet or smartphone – no matter where they are.

- Mondopad's WiFi also creates a wireless access point so guests in the room can easily deliver documents to the display or access the Internet without connecting to the organization's private network
- Cloud-based video conferencing for any-to-any video connections via PC, tablet, smartphone, video phone, executive video systems and more
- Remote participants see what's on the Mondopad via a web page served by the Mondopad

Phone It In

Authorized users can use their smartphone to connect to their internal network through the Mondopad. They can then share, view and control visuals through an experience optimized just for smartphones.

- Launch and control your presentation from your phone's touchscreen
- See the Mondopad's screen on your phone

Comprehensive Connectivity

The Mondopad is equipped with a full range of digital and analog inputs for computer, video and audio sources.

- HDMI Digital Video & Audio
- VESA Analog PC
- Multiple USB ports
- Component Video
- Composite Video
- S-Video
- RS232
- Analog Audio In and Out

Monitor and Manage

IT administrators and managed service providers can securely monitor and manage the Mondopad from anywhere.

- Embedded Intel vPro technologies and compatibility with industry leading remote monitoring and management software provide immediate access for controlling, analyzing and administering the Mondopad as a hooked IT asset

Business-Class Video Conferencing for Every Need

If you use an enterprise video conferencing system, Mondopad can fit right in.

- Add Monodopad as a SIP end point on your video conference server or service
- Install the desktop client onto Mondopad for your existing video conferencing system, just like you would a PC
- Works with all major video conferencing platforms, such as Polycom, LifeSize and Tandberg

If you don't have a video conferencing system, we have an affordable video conferencing solution from Vidtel that's as easy to use as making a phone call.

- Have a video conference with people on free consumer video conferencing applications and enterprise level telepresence systems simultaneously
- No up-front costs for infrastructure or technical resources for setup — it's all built-in to Mondopad
- Subscriptions start at less than \$50 per month per connection

Sound and Vision

The integrated HD video camera and sound bar are designed to eliminate conference room clutter and enhance the dialogue.

- High definition 720p camera with four integrated microphones captures stunning video and audio quality
- Voice-optimized sound bar for improved dialogue clarity

mondopad Specifications*

Display

Size	55"
Resolution	1920 x 1080
Refresh Rate	60 Hz
